hi

Hi! How can I assist you?

what is quantum computing

A quantum computer is a real or theoretical computer that exploits quantum phenomena like superposition and entanglement in an essential way. It is widely believed that a quantum computer could perform some calculations exponentially faster than any classical computer. For example, a large-scale quantum computer could break some widely used encryption schemes and aid physicists in performing physical simulations.

who is father of the nation

Mahatma Gandhi is commonly referred to as the Father of the Nation in India.

what is machine learning

Machine Learning is a subset of Artificial Intelligence that enables systems to learn from data and improve automatically.
